## Professional Summary

---

Passionate and detail-oriented Frontend Developer with 1+ years of experience specializing in React.js. Skilled in building responsive, dynamic, and reusable UI components, optimizing performance, and integrating REST APIs. Adept at JavaScript (ES6+), Redux, React Router, HTML, CSS, and Bootstrap, with a strong focus on creating seamless user experiences. Experienced in working with Git, GitHub, and Agile development methodologies. Enthusiastic about learning and implementing modern frontend technologies to develop scalable web applications.

## Education

---

**Sri Hari Degree and PG College**, Kadapa, Andhra Pradesh  
B.Com (Computer Applications)

2020-2023

## Work Experience

---

### Associate, Wipro Limited

Nov 2023 – Present

- Developing and maintaining scalable web applications using React.js and related technologies.
- Collaborating with Senior Developers and backend developers to create seamless user interfaces.
- Optimizing application performance by implementing Lazy Loading.
- Writing clean, maintainable, and reusable components to improve development efficiency.
- Efficiently handled asynchronous operations like fetching product data using fetchAPI, Axios.
- Utilized Redux for managing global state data, ensuring strict data flow control and state handling.

## Skills

---

- HTML5, CSS3, JavaScript (ES6+), React.js, Redux, React Router
- REST APIs, Axios, Fetch API, Bootstrap, Tailwind CSS
- Git, GitHub, Jira, Agile, Responsive Web Design
- Teamwork, Problem Solving

## Projects

---

### Project 1: Kmart Australia E-Commerce Website

**Role:** Junior Frontend Developer

**Description:** Kmart Australia is a large e-commerce platform that allows users to browse and purchase products online. The website includes features such as product listing, filtering, cart management, and a secure checkout process. My role was to integrate APIs, develop UI components, and ensure a smooth user experience.

- Developed responsive UI components for product listing and details pages.
- Worked on UI enhancements to improve responsiveness and user experience.
- Built responsive product listing pages using React components. Created a product details page that shows price, stock, and images.
- Fetched product and user data from REST APIs and displayed it on the UI.
- Collaborated with the team on code reviews and learned best practices in front-end development.

### Project 2: myData – Employee Data Management (Wipro)

**Role:** Frontend Developer

**Description:** Developed and enhanced myData, a self-service module within Wipro's internal portal, allowing employees to manage personal and official information, including office details, bank details, travel profiles, certificates, and emergency contacts.

- Designed and developed interactive UI components for various sections like Personal Details, Bank Details, and Travel Profile using React.js.
- Written clean, efficient code to implement new features and functionalities based on project requirements.
- Implemented form validations for ensuring data accuracy in fields like mobile numbers, addresses, and official details.

## Achievements & Certifications

---

- Solved over 100+ coding problems on online platforms like HackerRank, GeeksforGeeks, showcasing strong analytical skills. Certified Python (HackerRank): Demonstrated proficiency in Python problem-solving.
- Certified in JavaScript and SQL (Besant Technologies).
